CONFIDENTIAL FOR FILE RECORD

SUBJECT: [] Demonstration at National Institutes of Health

1. On February 6 and 9, 1970, the [] fulfilled part of its contractual obligation [] by presenting demonstration of the capabilities of their graphics terminal in performing intelligence related tasks. Two demonstrations were held on Friday and two on Monday at the National Institutes of Health in Bethesda, Maryland. Each presentation lasted approximately two and one-half hours and a total of 57 Government personnel saw the demonstrations.

2. The demonstration on graphics began with the creation of simple two-dimensional graphics and progressed through the manipulation of two three-dimensional objects in three-dimensional space. For example, an aircraft was positioned in a revetment to see how well it fit. The display on editing functions showed how text could be entered, stored, retrieved and edited. Words, phrases, sentences and paragraphs were moved or changed. A paper tape was punched for input to the Photon typewriter, and a sample of the output of the Photon was shown. A hand-out (attached) describing the program and the [] terminal was given to each observer.

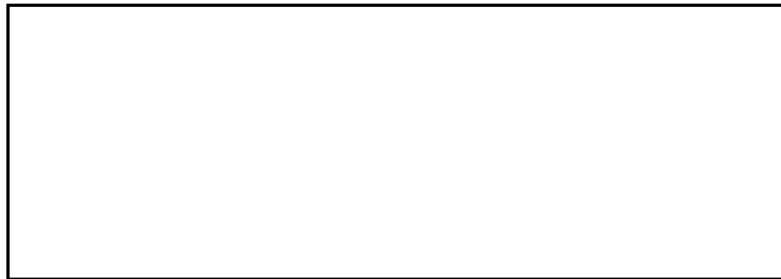

3. Personnel from NPIC in attendance were:

4. Other Government personnel present were:

25X1 [] - National Institutes of Health
 25X1 [] - D/Ch Publications Division/OBGI
 25X1 [] - ADP Coordinator/DIAAP-9
 25X1 [] - NSA
 25X1 [] - Chief/C-6/NSA
 25X1 [] - Special Asst to Director/OBGI
 25X1 [] - NSA
 25X1 [] - ADP Coordinator/DIAAP-9
 25X1 [] - Chief/Printing Services Division
 25X1 [] - Printing Services Division

5. Personnel from [] were:

25X1 [] - Regional Sales Manager
 25X1 [] - Senior Vice President
 25X1 [] - Applications Programming Director
 25X1 [] - Applications Programmer
 25X1 [] - Director of Applications
 25X1 [] - Vice President of Marketing

6. All of the participants I talked to seemed quite impressed with the demonstration. Everyone was not convinced that such a display terminal should be purchased but I did not talk to anyone who could not see considerable potential for the system. On February 10, [] of OSD and Mr. [] of OBGI both called and expressed interest in another demonstration. [] also suggested the possibility of jointly funding further research and experimentation. I am continuing to seek additional reactions to the demonstration.

MEMORANDUM FOR THE RECORD

SUBJECT: Additional [] Demonstration at NIH

1. A total of four demonstrations of the results of our contract with [] were presented at the National Institutes of Health in Bethesda, Maryland on February 6 and 9, 1970. Two people from Printing Services Division and two from OEGI attended and called me the day following the last demonstration to ask me if another demonstration could be arranged. [] of PSD called and indicated that they know of others who would like to attend from their organizations and from [] [] from NSA has told me that he knows of other personnel from Headquarters who would be interested.

2. I have arranged with [] to present another demonstration at NIH on February 25 at 1800 hours. While this time may be inconvenient for some, it was the only time we could arrange in the near future. [] will fly down from [] to present the demonstration. It will be quite similar to the previous presentations at NIH.

3. Names of participants from NPIC are not being solicited as it is felt that there is sufficient interest from the previously mentioned organizations to fill the small space available. However, if space permits, a few NPIC personnel may be scheduled for attendance.
